

PRACTICAL NO. 04

Design and Develop Custom Application (Mini Project) using Salesforce Cloud

Phase 1: Accessing the App Manager

1. **Open Salesforce** in Lightning Experience mode.
2. Click the **Gear Icon** in the top-right header and select **Setup**.
3. In the **Quick Find box** on the left sidebar, type "**App Manager**".
4. Click on **App Manager** under the Apps section.
5. Click the **New Lightning App** button at the top right of the App Manager page.

Phase 2: App Details and Branding

Define the identity and visual style of your application:

- **App Name:** Enter a unique name (e.g., "CQA-BOT").
- **Developer Name:** This will auto-populate based on the App Name.
- **Description:** Provide a brief summary of the app's purpose (e.g., "Cloud Computing").
- **Branding:** Upload a logo image and select a primary color for the app header.
- Click **Next** to proceed.

Phase 3: App Options

Configure navigation and device support:

- **Navigation Style:** Select **Standard navigation**.
- **Supported Form Factors:** Choose **Desktop and phone** to ensure accessibility across devices.
- **Setup Experience:** Select **Setup (full set of Setup options)**.
- Click **Next**.

Phase 4: Utility Items (Optional)

Add productivity tools to the fixed footer of your app:

- Click **Add Utility Item** to include tools like a Calculator, Notes, or Recent Items.
- If no utilities are required for your mini-project, simply click **Next**.

Phase 5: Navigation Items

Choose the tabs and features available in the app's navigation bar:

- From the **Available Items** list, select the objects you need (e.g., Accounts, Contacts, Reports, or custom objects).
- Click the **Right Arrow** to move them to the **Selected Items** list.
- Click **Next**.

Phase 6: User Profiles

Assign access permissions to specific groups of users:

- From the **Available Profiles** list, find **System Administrator**.
- Move it to **Selected Profiles** to ensure you have access to test the app.
- Add any other profiles as required by your project scope.
- Click **Save & Finish**.

Phase 7: Verification and Testing

Confirm the app is correctly deployed:

- Open the **App Launcher** (the 3x3 grid icon).
- Search for your app by its name (e.g., "CQA-BOT").
- Click on the app to open it.
- **Test Case 1:** Create a **New Contact** within the app to verify it is functioning as intended.
- **Test Case 2:** Upload an **Image** or attachment to a record to check file handling.

Maintenance Note: You can modify navigation items, utilities, and profile access at any time by returning to the App Manager in Setup.
